CAPTURING THE KAISER LATEST COSSACK HABIT

Cologne, Dec. 19.—The Kolische Zeitung prints the following article regarding efforts made to capture the German emperor at the time of his reported trip to the eastern war field: "Emperor William is said to have paid a visit recently to the Austrian arena of war. The rumor spread among the Cossacks who were advancing in the vicinity of Lyck that the Emperor was near that town, and they decided to capture him. The London Daily Telegraph relates that a regular competition resulted among them at this hunt for the German emperor and that one day a corporal of the Cossacks arrived at the Russian camp with a prisoner whom he designated as 'Wilhelm.' However, the

corporal was sadly disappointed, for, although the prisoner showed a certain resemblance to the German emperor, he proved to be a lieutenant of the ulans. This resemblance, according to the English newspaper, was in his mustache. "The Cossack, however, would not be discouraged and the following morning returned with two prisoners and exclaimed 'I am positive that one of the two is Wilhelm.' The Russian army chiefs perceived that the unsuccessful hunt for the German emperor was likely to overthrow the whole Russian tactics and strategy and gave instructions that 'Wilhelm is not to be captured,' and thus the hunt for Wilhelm was abandoned."

Gifts That Men Like.

BY HELEN HOWE.

Most women know that men prefer simple, useful gifts rather than those for personal service, even though the latter represent a much larger amount of time or money. For instance, a girl may spend days crocheting a tie or knitting a waistcoat which will not be appreciated by one man in ten. But there will be no mistake in giving a shirt case. This can be both useful and ornamental.

The materials cost little and the

this shirt case is a great improvement over the old envelope shape, while the extension set in keeps the shirt from warping, as they do in the old model. The card-board keeps the case perfectly flat, making it convenient for laying in a drawer. It cannot crush.

A home-made collar box to match will complete the gift. For this cut a round of cardboard eight inches in diameter and a strip three inches wide to surround it. Cover the round of cardboard eight inches in diameter and a strip three inches wide to surround it. Cover the round of cardboard on both sides with linen and then cut a double strip nine inches wide when doubled the length of the cardboard. Double the material before cutting to avoid a seam. Run a stitching through the length of the two strips to inclose the cardboard, and bast the raw edges to the covered round which will be the bottom of the bag. Bind together with the braid. About two inches from the mouth of the bag work eyelets at intervals and run a cord through for a drawstring. Do not use ribbon. It may look prettier, but will not be appreciated. If liked the lining may be of a contrasting color or material, but the principle will be the same.

To make the set the cost will be: Linen, one and a half yards, about 50 cents; braid and cords 35 cents; silks, 15 cents, more or less according to decoration.

one illustrated is very easy to make. It measures 12 by 20 inches when finished and requires one yard of linen crash in cream or ecru, or, in fact, any preferred material, forty inches wide. First, three pieces, each measuring 18 by 21 inches, are cut and two basted together to make a bag. A piece of stiff cardboard is slipped in and the mouth of the bag basted across. Next a straight strip of the material is basted all around the edge of the bag. This is to make

an extension that will keep the shirt, say six or more, lying perfectly flat in the case. The next thing is fancy dictates, either with initials only in cross or satin stitch or a simple addition as a sprig of holly embroidered there. This would be very effective on gray linen, while brown would be equally good on pale tan or ecru. This done the decorated piece is basted to the other side of the extension strip. Lastly a flap is added and then all the basted edges are bound with a washable braid, using a machine stitch for sewing it on. The style of

Members of the Oklahoma Commercial School Proprietors' association will meet in convention at the Lee-Huckins hotel Saturday, December 20. This organization was perfected last spring at the instigation and suggestion of J. W. Deansford, state manager of the L. C. Smith Typewriter company, after numerous complaints had been received of unreliable people who had been establishing so-called business colleges at various points.

The association is composed of proprietors and principals of many of the reputable business colleges of the state, and has for its primary object the betterment of business school methods. R. H. Wilson, state superintendent of public instruction, has taken a great interest in this movement and in a letter to Governor Cruce and the members of the legislature asks that a law be passed standardizing the commercial colleges established in Oklahoma in the future.

Charity Ball.

The Charity Ball Friday evening given by the Elks club was a brilliant success in every detail. The ball room as well as the lower floor was decorated profusely with Christmas wreaths and balls of holly, boxwood and mistletoe, and many red roses and poinsettia blooms added to the attractiveness. The orchestra in the ball room was led behind a mass of ferns and palms, and punch was served throughout the evening, with a collation later.

The grand march was led by Mr. and Mrs. Walter C. Dean, followed by the exalted ruler, and his wife, Mr. and Mrs. Claude Nowlin. The past exalted rulers and their wives and the other officers followed in their order, and more than two hundred and fifty guests were in the line of march.

The patrons and patronesses of the occasion were Messrs. and Mesdames S. H. Harris, W. H. Ledbetter, W. Frank Wilson, Fred Sutton, Harley Lee, George Stiles, George Hagar, C. R. Dean, George Kerr, E. E. Blake, Harry Gerson, James Franklin Harbison, H. C. Watton, A. W. White and E. E. Kirkpatrick.

In the parlors below Mrs. Samuel Harris and Mrs. White were hostesses and a large party of guests enjoyed the game of auction. Mrs. George Depik and Mr. Guy Knibball made the top scores and were the recipients of a cluster of roses and a Christmas wreath.

Another feature that attracted much interest was a "county fair" in the dining room, where the Elks held an auction sale of all sorts of Christmas goods, dolls and toys, which engendered much merriment, and competitive bidding. The spirit of good fellowship and Christmas cheer was everywhere manifested and the large company of the Elks and their friends joined with enthusiasm in the evening amusement made more pleasurable because it was for the benefit of the needy. The large sum will be devoted entirely to the Elks' Christmas offering to the poor.

"WEAVER" ALUMINUM DEMONSTRATION AT NATION'S.

A very successful demonstration of Weaver Aluminum utensils has been in progress for three days at The Nation Co., Hardware Store, 114 West Grand Ave.

The Nation Company sell these goods just as they advertise them. However, through a typographical error in Friday's Times a Saturday special on Aluminum Roasters was quoted at 29 cents instead of \$2.99, the special low price at which Mr. Nation offered them.

In justice to Mr. Nation The Times gladly makes this correction. The demonstration continues this afternoon, and this evening from 7 to 9 o'clock and is in charge of Mrs. Etta Doss representative of the factory.

GIRL WIFE'S FALL MAY PROVE FATAL

Mrs. Ethel Leonard, the 16-year-old wife of Noble F. Leonard and the step-daughter of Bob Snyder, proprietor of the dance hall in the Randall building at 212 West First street, was dangerously injured by a fall from the fifth story of the building a little before 10 o'clock last night.

As a result of the fall the girl received two fractures of one leg and it is believed a fracture of the spine. The lower part of her body and her lower limbs are paralyzed and it is believed by attending physicians at the city hospital where she was taken that an operation will be necessary to relieve her.

The accident occurred when she attempted to slide down a rope to her husband whom her mother had refused to allow her to see.

The young people married a little over two months ago against the wishes of the girl's mother and step-father and after living together for several weeks, the mother compelled the girl to go to her home. There she was kept a prisoner in the room in front of the dance hall where her mother lives. The mother then induced her to file a suit for divorce it is alleged, and pending action kept the girl in the building.

Last night Leonard gave a friend, Cecil Youngblood, a note to give to his wife, asking her to escape and come to him. Youngblood took the note up to the hall and gave it to the girl, who asked Miss Mattie Bennett to read it to her.

As soon as the girl read the note to Mrs. Leonard the young wife entered her mother's room. Quickly running to the kitchen she took down a small cotton clothline and tying one end to the door and the other to her wrist, slid out of the window to her husband, who was standing below.

As she swung her weight on the rope it parted when she was but a few feet below the fifth story window. Without uttering a sound she fell to the third floor where she struck a guy wire and from there fell through an awning and crashed into the arms of her young husband, who had rushed in to break the force of her fall when the rope broke.

Her weight crushed him to the ground and she fell sufficiently hard to sustain very serious injuries. It was several moments before the horror-stricken bystanders came to the assistance of the husband in carrying for the girl, and she was carried into the Hultingley drug store at First and Robinson streets. The Street and Draper ambulance was called. While waiting for the ambulance to come, the step-father of the girl, demand of Patrolman O. M. Eide that Leonard be arrested. Snyder insisted that the boy had purposely forced her to jump out of the window.

"Don't arrest Noble. It wasn't his fault. I was just going to him," said the girl.

The mother and step-father both blamed the boy and insisted upon his arrest. When Officer Estis learned that the boy had sent his wife the note that occasioned the accident he placed him under arrest upon a charge of vagrancy to hold him for investigation. He was dismissed this morning by Municipal Judge Price, as there was no charge upon which he could be held, since no incriminating evidence was obtained as to the charge of the girl's parents.

Immediately after he was freed the boy asked the way to the city hospital and went out to visit his girl wife.

Fire Prevention Measure Wanted By Many in State

Prevention of fire waste is a problem that may receive considerable attention by the coming legislature, with the possibility of some measure being passed that may in a great way make for better conditions than have heretofore existed in the state. In the last few years there has been an appreciable reduction in the amount of fire waste, in dollars and cents. In the state, this due in a great measure through the efforts of the fire marshal's office.

For the last several years, however, there has been a general movement supported by the fire marshal's associations, insurance companies and other interests for laws fixing some responsibility upon individuals for losses occasioned by preventable fires. This system is in vogue in many of the European countries and has had a remarkable effect in reducing the fire waste.

U. S. Waste High. The fire waste of the United States is said to be \$500,000 a day, extraordinarily high compared with that of any other civilized nation. Compared with other countries, the fire loss of the United States is 84 cents on the \$100 of insurance, England 27 1/2 cents, Norway 24, Sweden 21, Austria-Hungary 16 and Germany 12.

A bill embodying provisions based materially on the principles of fire waste regulations in the European countries has been prepared for introduction in congress. The question now is, however, would it not be better for the states to take it up and pass state laws on the subject, keeping in mind that a uniform measure be enacted.

The principle in the European countries is similar to the fellow servant law or employers liability act in this country, and provides that where a man has a fire due to his own negligence is compelled to pay the cost of extinguishing it, with other penalties, instead of imposing the burden upon the community.

Many Are Preventable. Fire prevention authorities agree that a large per cent of the fires are preventable and are due to carelessness. The imposing of a penalty for this carelessness will, they believe, greatly reduce the fire waste and lower the cost of insurance. An instance that would illustrate the principle of the proposed movement happened in New York recently. The court rendered a decision in a suit begun by Fire Commissioner Adamson of New York against the Greenwood Cemetery Corporation, a large owner of New York property, for refusing a fire directly due to the refusal of the corporation to make improvements required by the fire prevention bureau of that city. It is understood that insurance legislation will be asked this winter, and it is not unlikely that some fire prevention proposition will come up.
